For the people  
you care about most

## Let Our Family Take Care of Yours

When someone can no longer live safely at home, or when looking after a loved one requires more than family members can provide, Avery Heights Health Care Center is the place to turn to for skilled, compassionate care in a cozy and comfortable environment.

At Avery, residents are encouraged to make their spaces their own, and the doors are always open for families and friends to visit. Our certified nursing assistants (CNAs) are trained in geriatric care and operate under the close supervision of Registered and Licensed Nurses. Medical oversight is provided round-the-clock, and our entire team of experienced professionals are there to service the physical, cognitive and psychological needs of all our residents.

Families are fully involved in all aspects of care planning. This planning focuses not simply on limitations, but also on strengths and abilities so that residents can participate in activities that will continue to enrich their lives and keep them as independent as possible.

Regardless of the care level your loved one requires, your family can take comfort in knowing that it will be provided with compassion, respect, and attention to individual needs. At Avery, we consider each resident to be part of our family.
